

# Oracle Cloud Application Foundation Demo

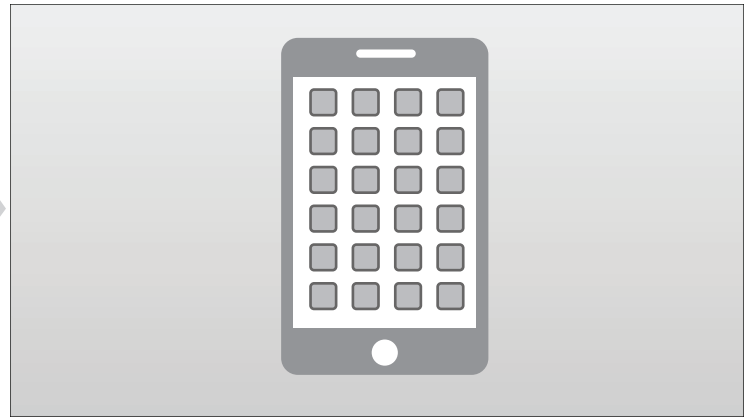

**Introduction:** Logo will roll onto screen

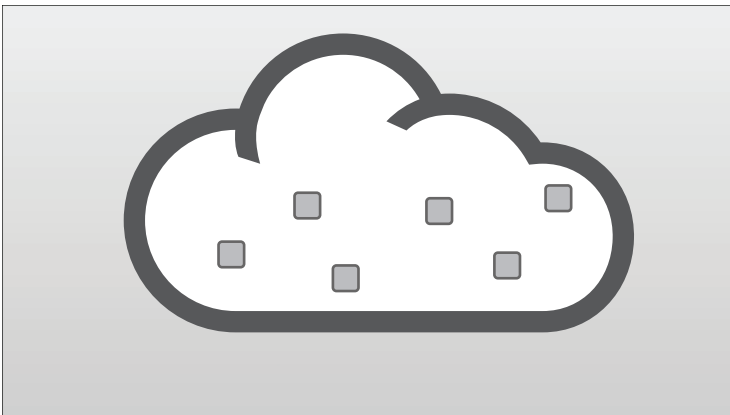

**Automotive Systems:** Globe rolls off to left and car drives in from right. Navigation, Emergency services & Connectivity icons pop out from car

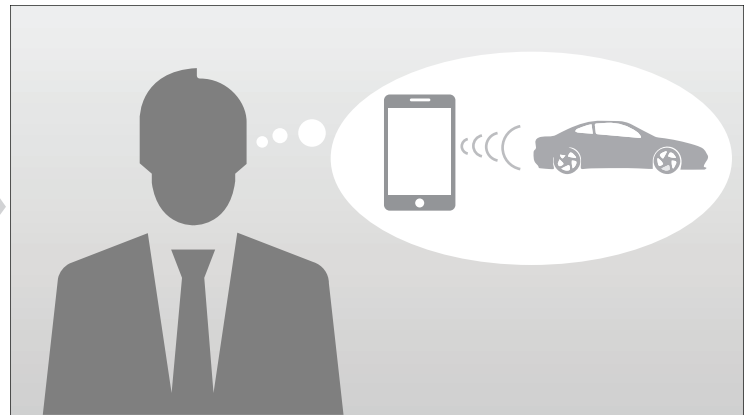

**Expanding application offerings:** Previous application icons multiply

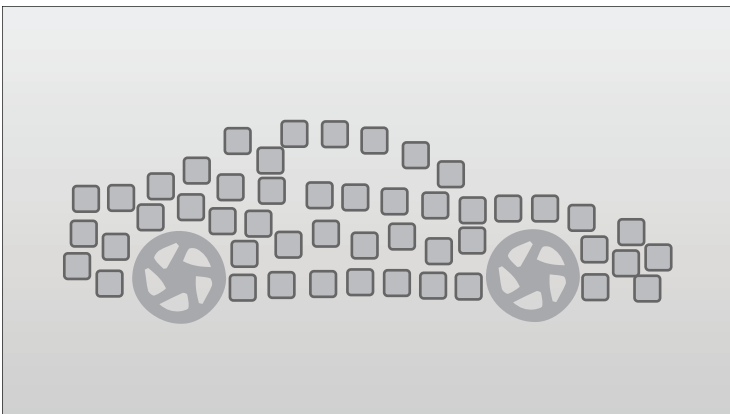

**Mobile device growth:** Application icons group together into mobile phone

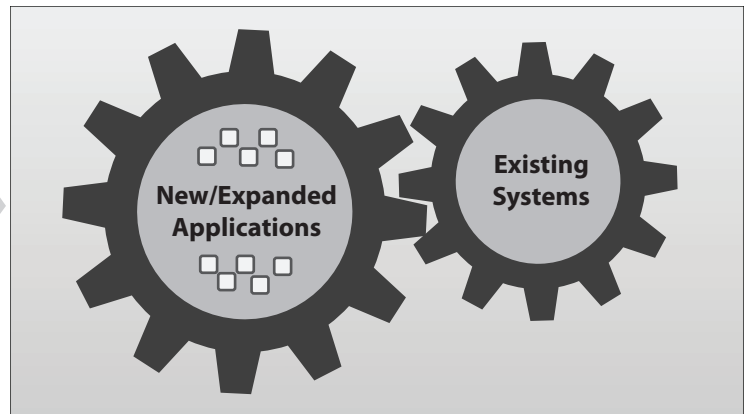

**Host in the Cloud:** Phone drops away and application icons start floating up while camera follows. Eventually a cloud appear and app icons float within cloud

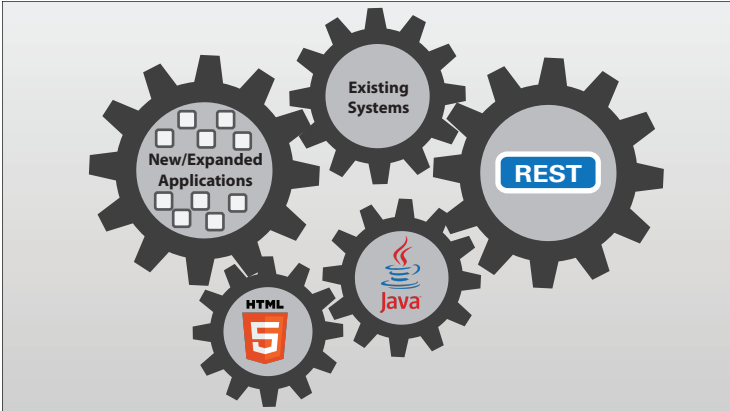

**Robust and Growing Requirements:** User appears with idea for vehicle interaction

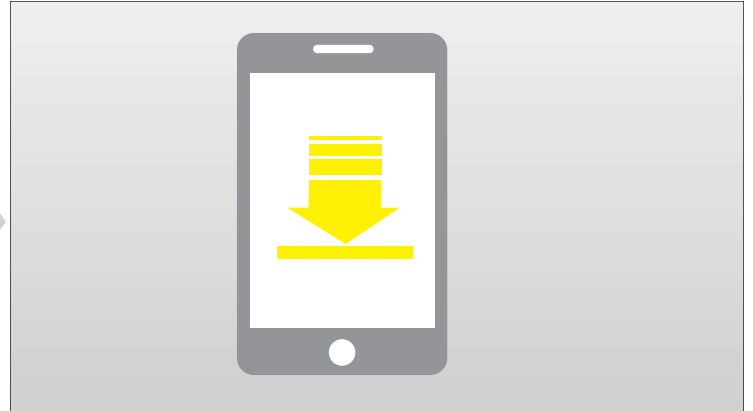

**New or Expanding Applications:** Zoom into car which bursts into application icons.

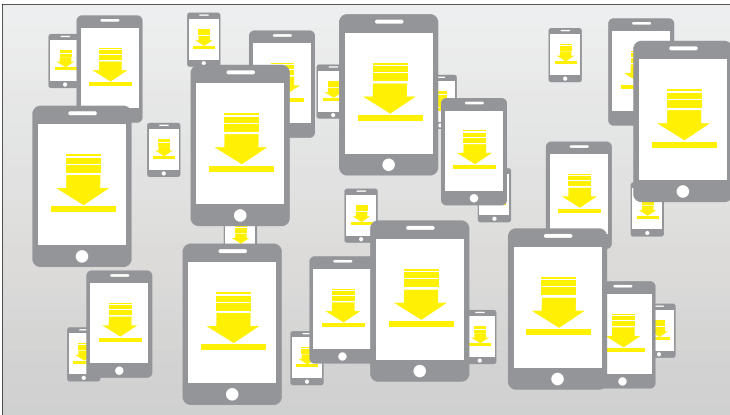

**Tie in with existing systems:** Apps group together and car wheels become gears that rotate to show integration with existing systems

**Standards-based:** Standards-based gears animate onto screen and "gear up" with applications & systems

**Real-time Updates:** One of the application icons will zoom in to show an animated update symbol showing progress

**Scalability:** Application icon will zoom out to show "thousands" of updates being performed
