03: "xx"

**Animation Notes:**  
Xxxx

04: "xx"

**Animation Notes:**  
Top of head opens to release thought "bubbles"

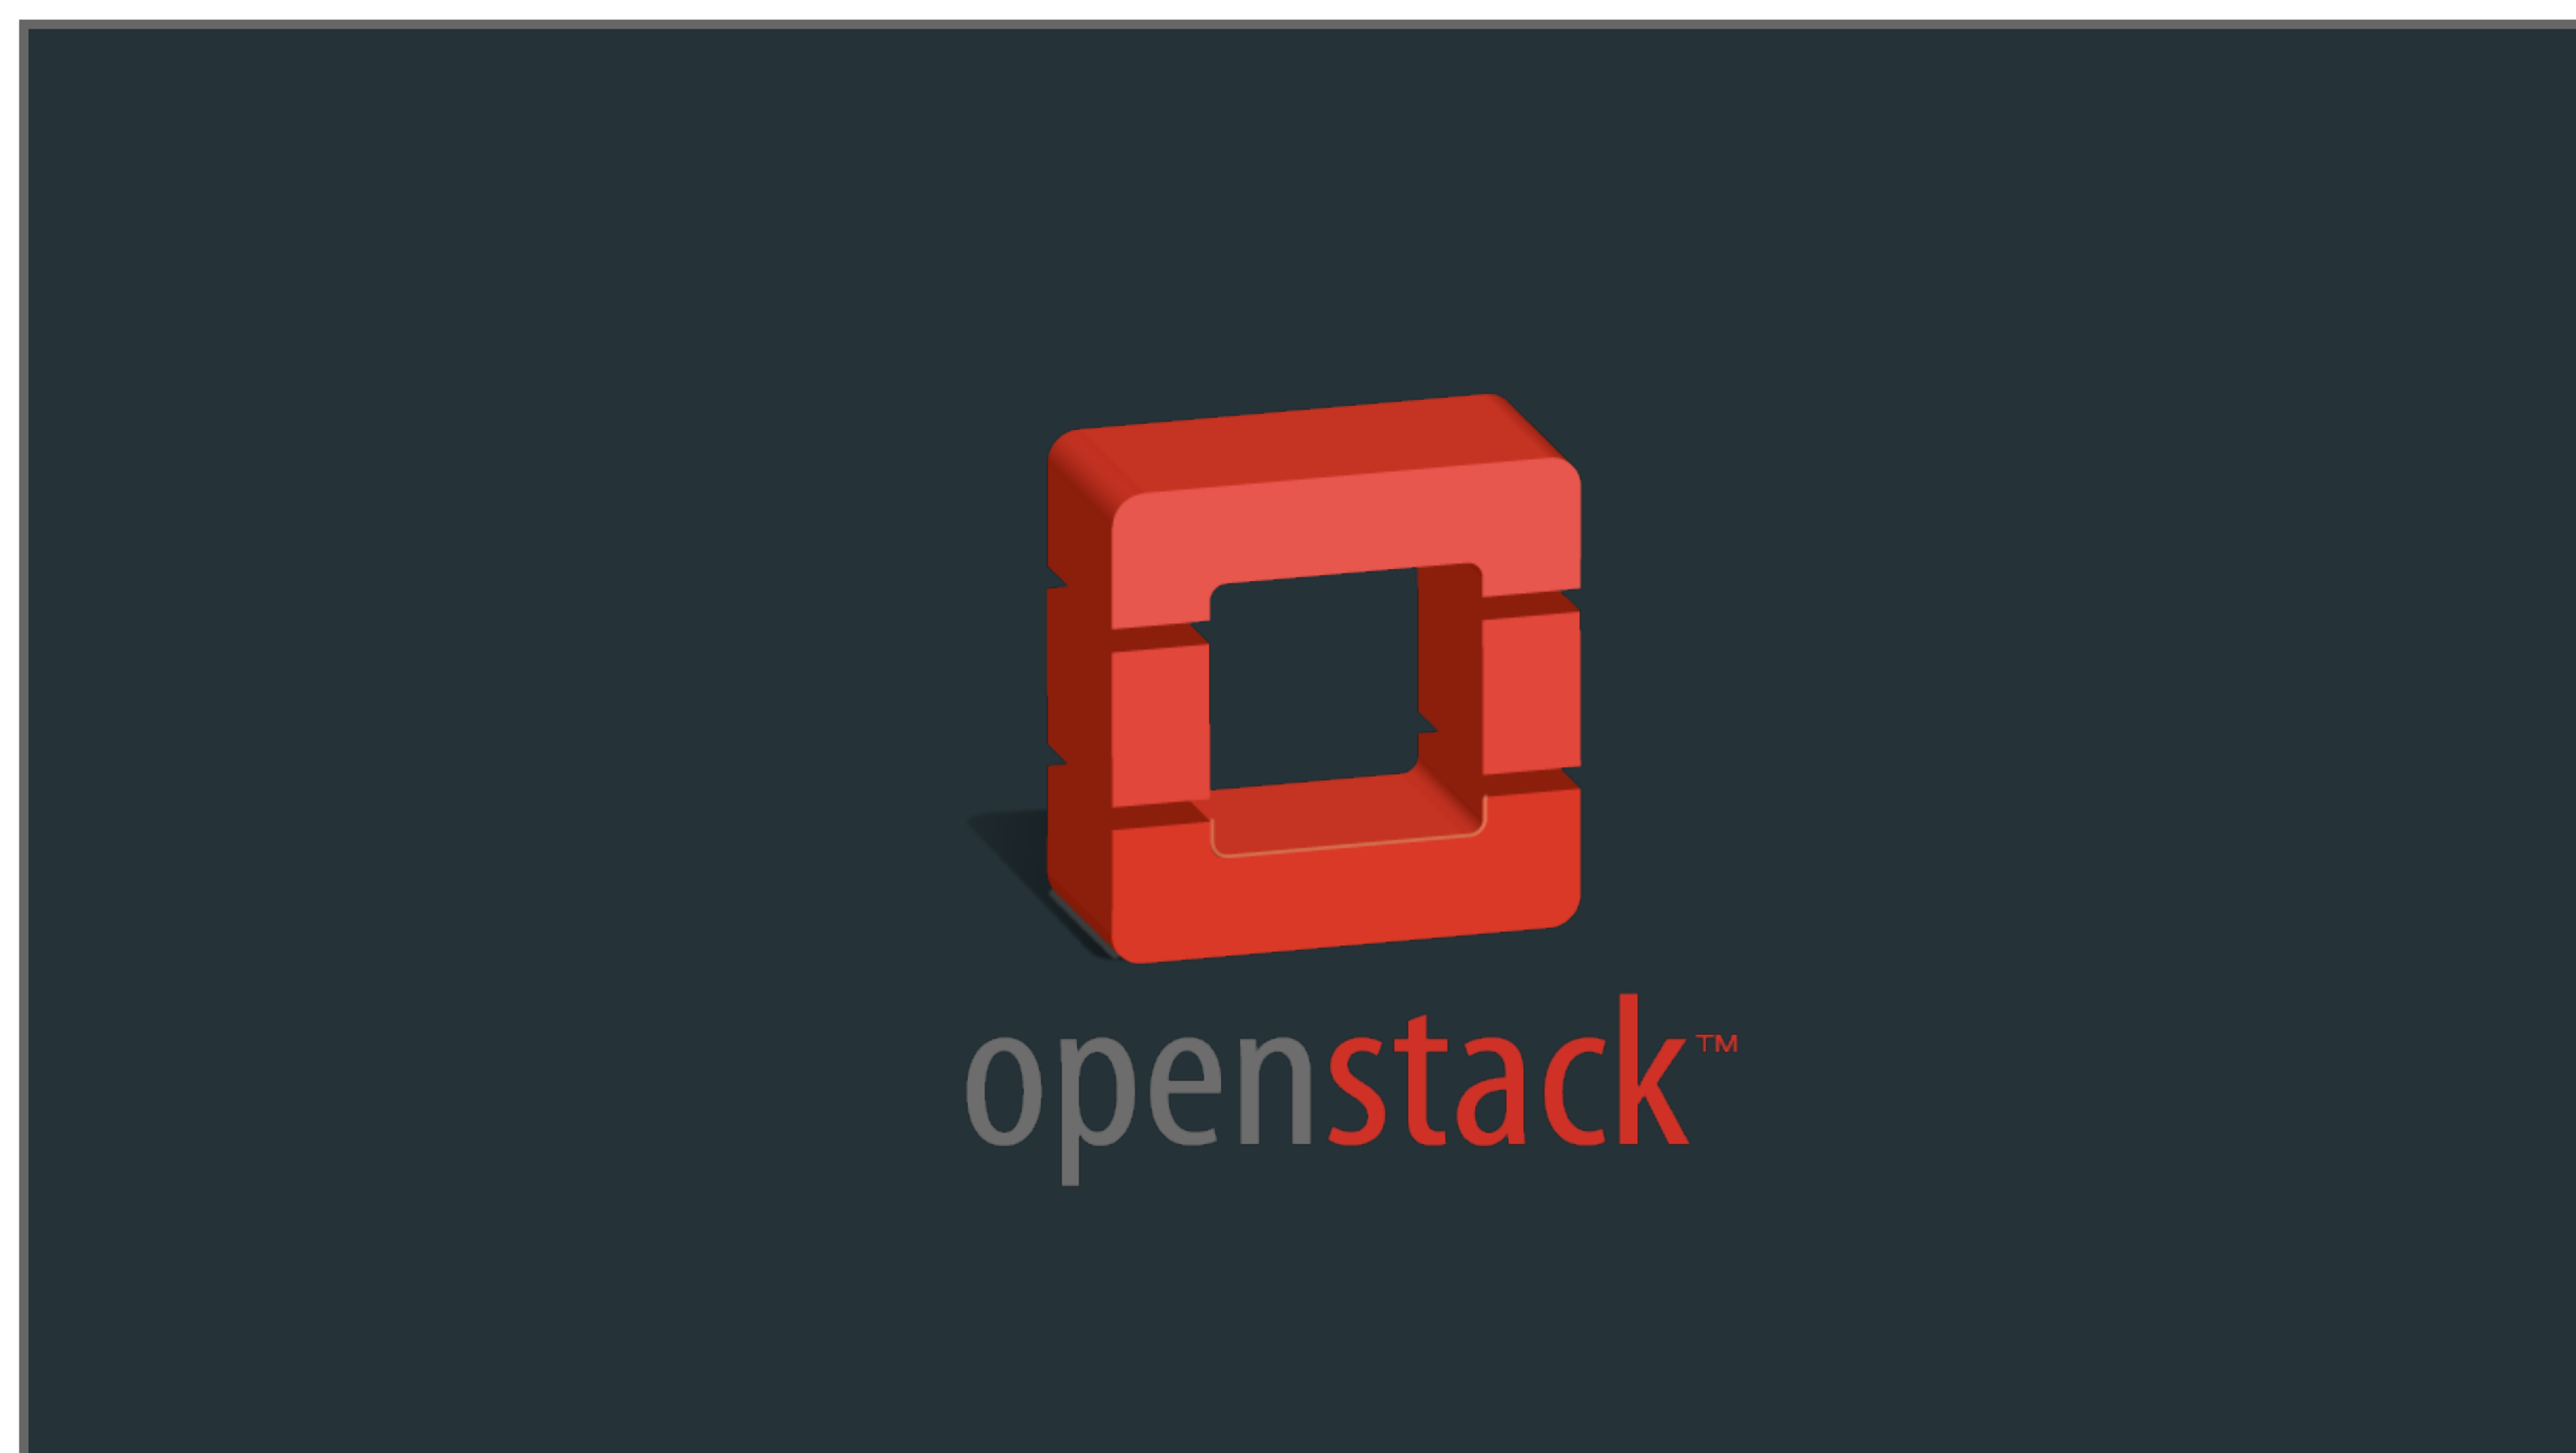

05: "xx"

**Animation Notes:**  
Camera animates up to follow "bubbles" to reveal the docker logo. Docker logo stays static while bubbles continue to flow up and disappear next to logo (like ocean bubbles)

06: "xx"

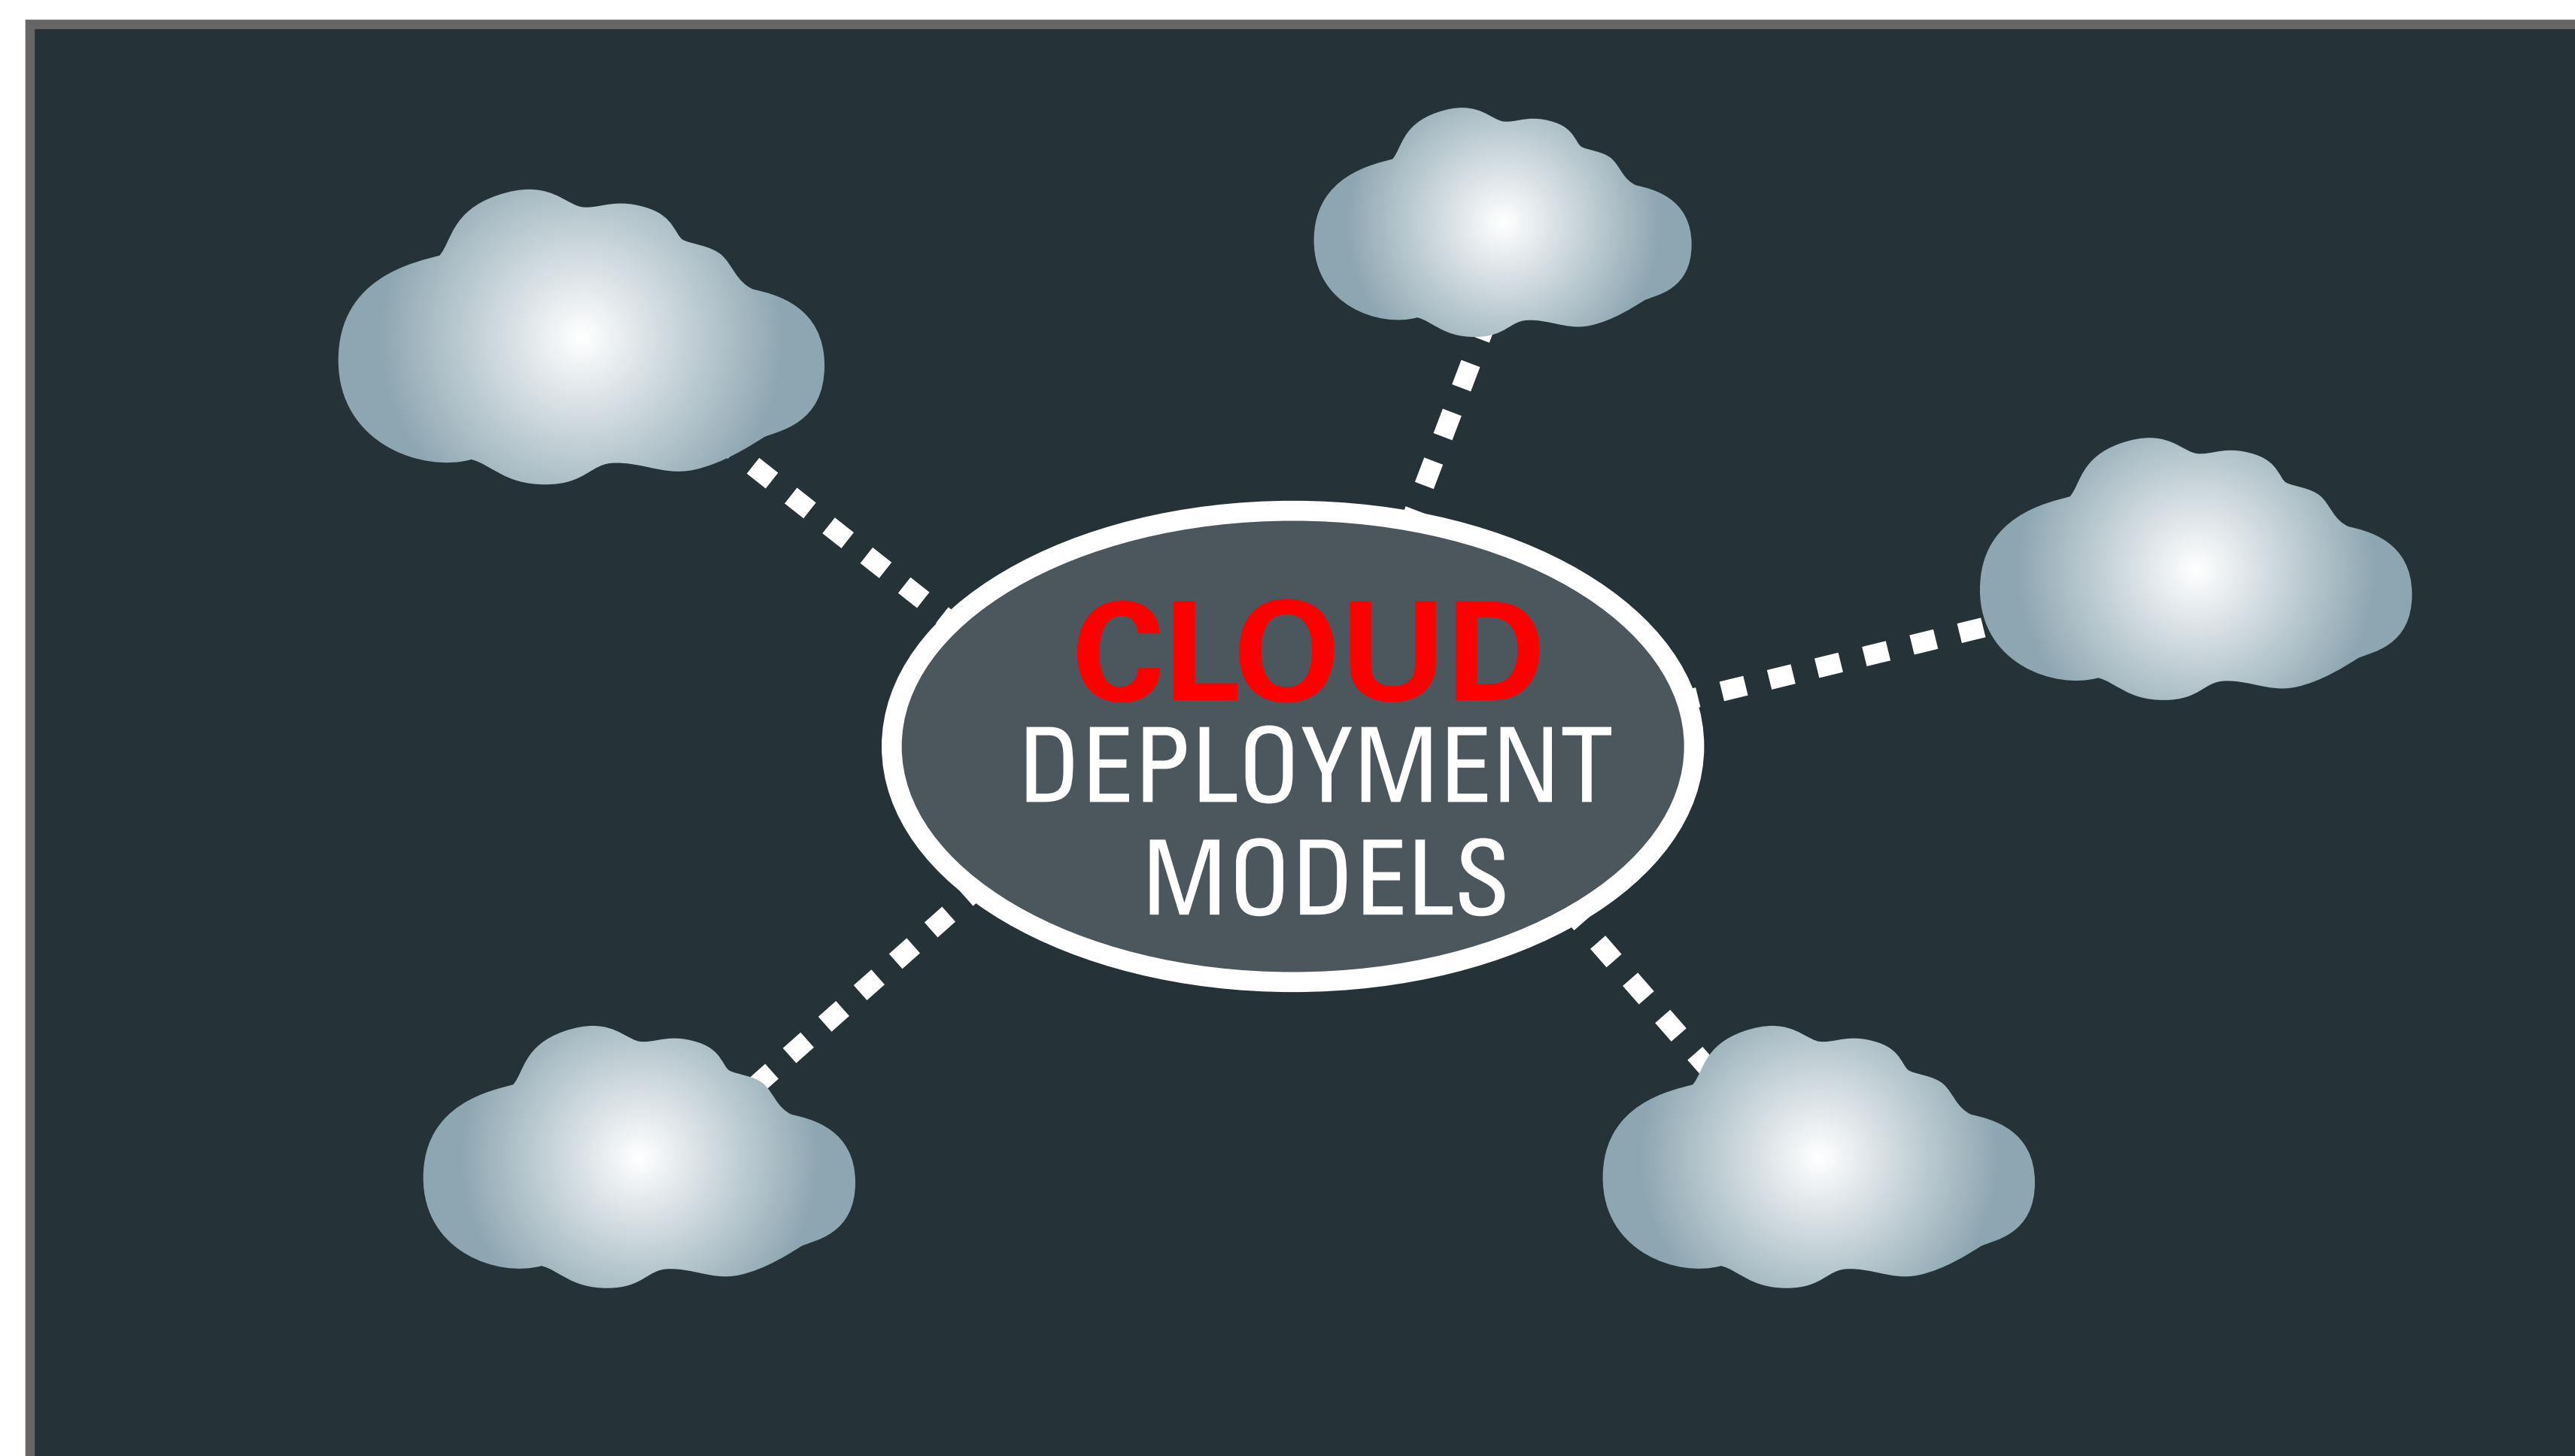

**Animation Notes:**  
Again, the camera animates up. The containers on the docker logo will float up while the logo goes down. The camera follows the containers which stop when the "Linux Containers" text appears.

07: "xx"

**Animation Notes:**

Camera animates up and the containers float up and change to a red color to form the openstack logo.

08: "xx"

**Animation Notes:**

OpenStack logo spins and morphs into Cloud Deployment Models icon and the cloud icons animate out from the center.

09: "xx"

**Animation Notes:**

Transition to next scene

10: "xx"

**Animation Notes:**

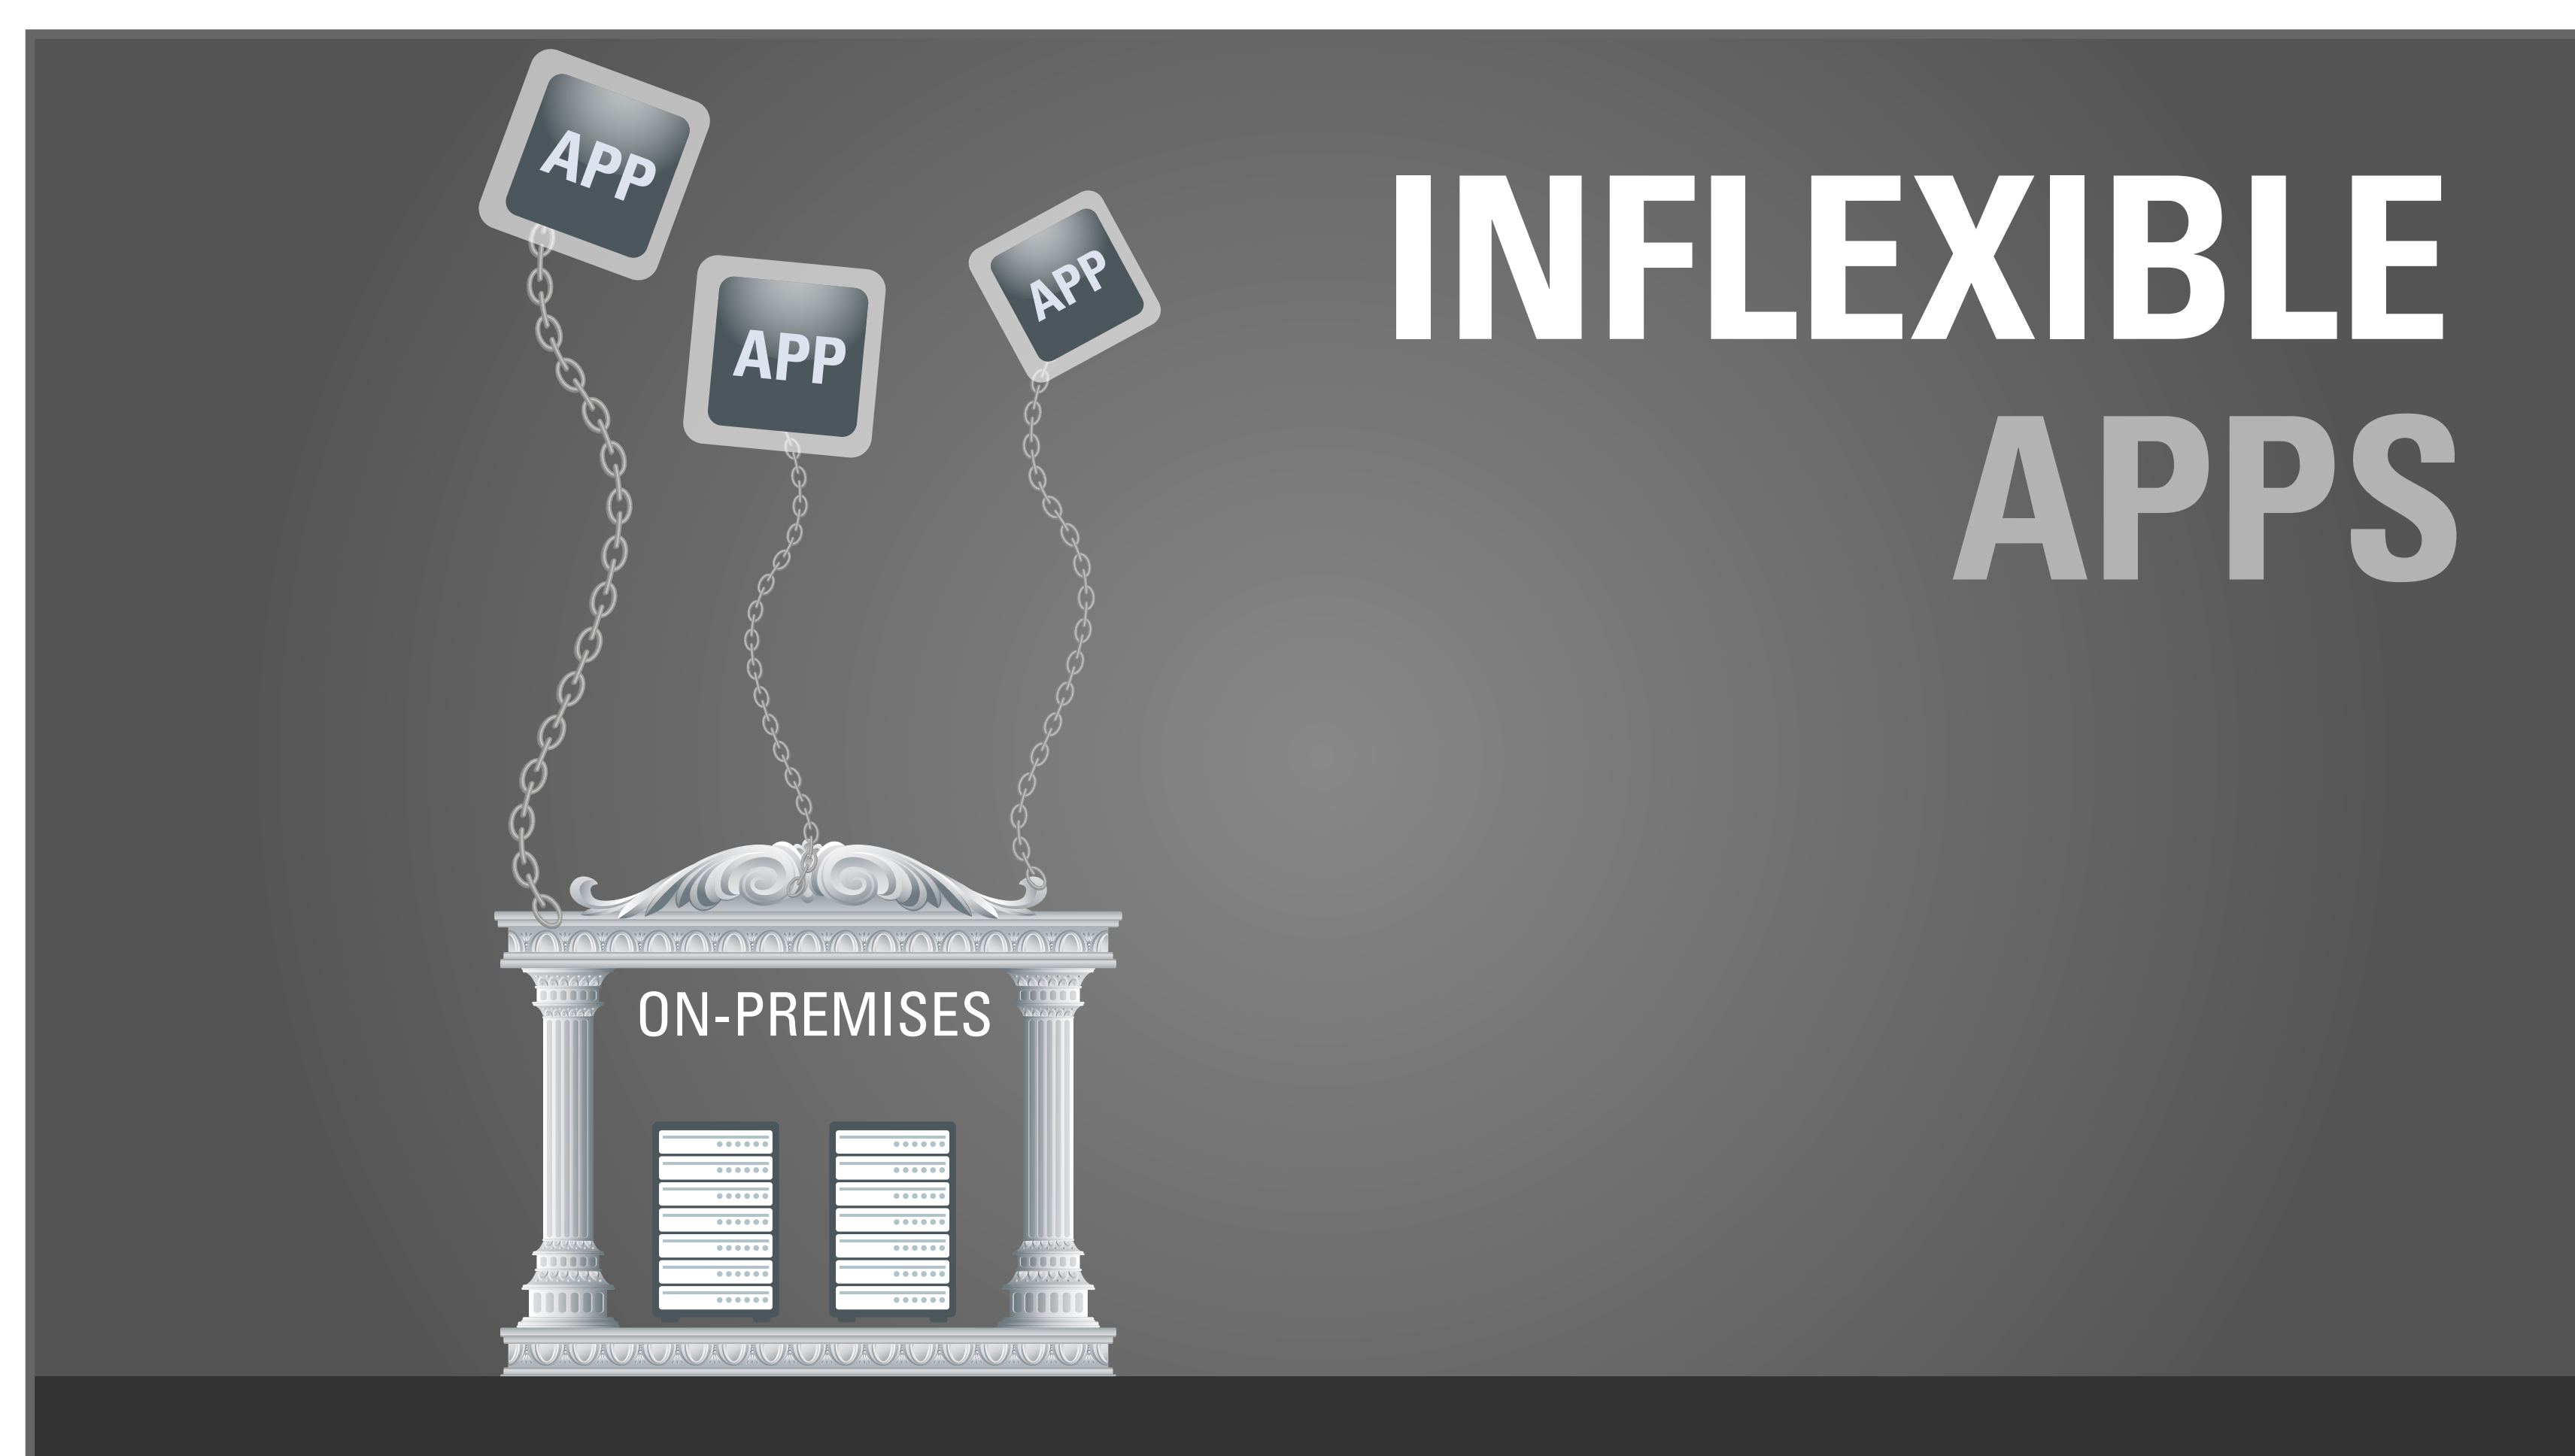

Show pillars to represent the "Old" way which looks substantial but represents the old technology and infrastructure.

11: "xx"

**Animation Notes:**

Text morphs to a couple servers with apps

12: "xx"

**Animation Notes:**

Apps start floating up only to reveal that they are anchored to the structure.

13: "xx"

**Animation Notes:**

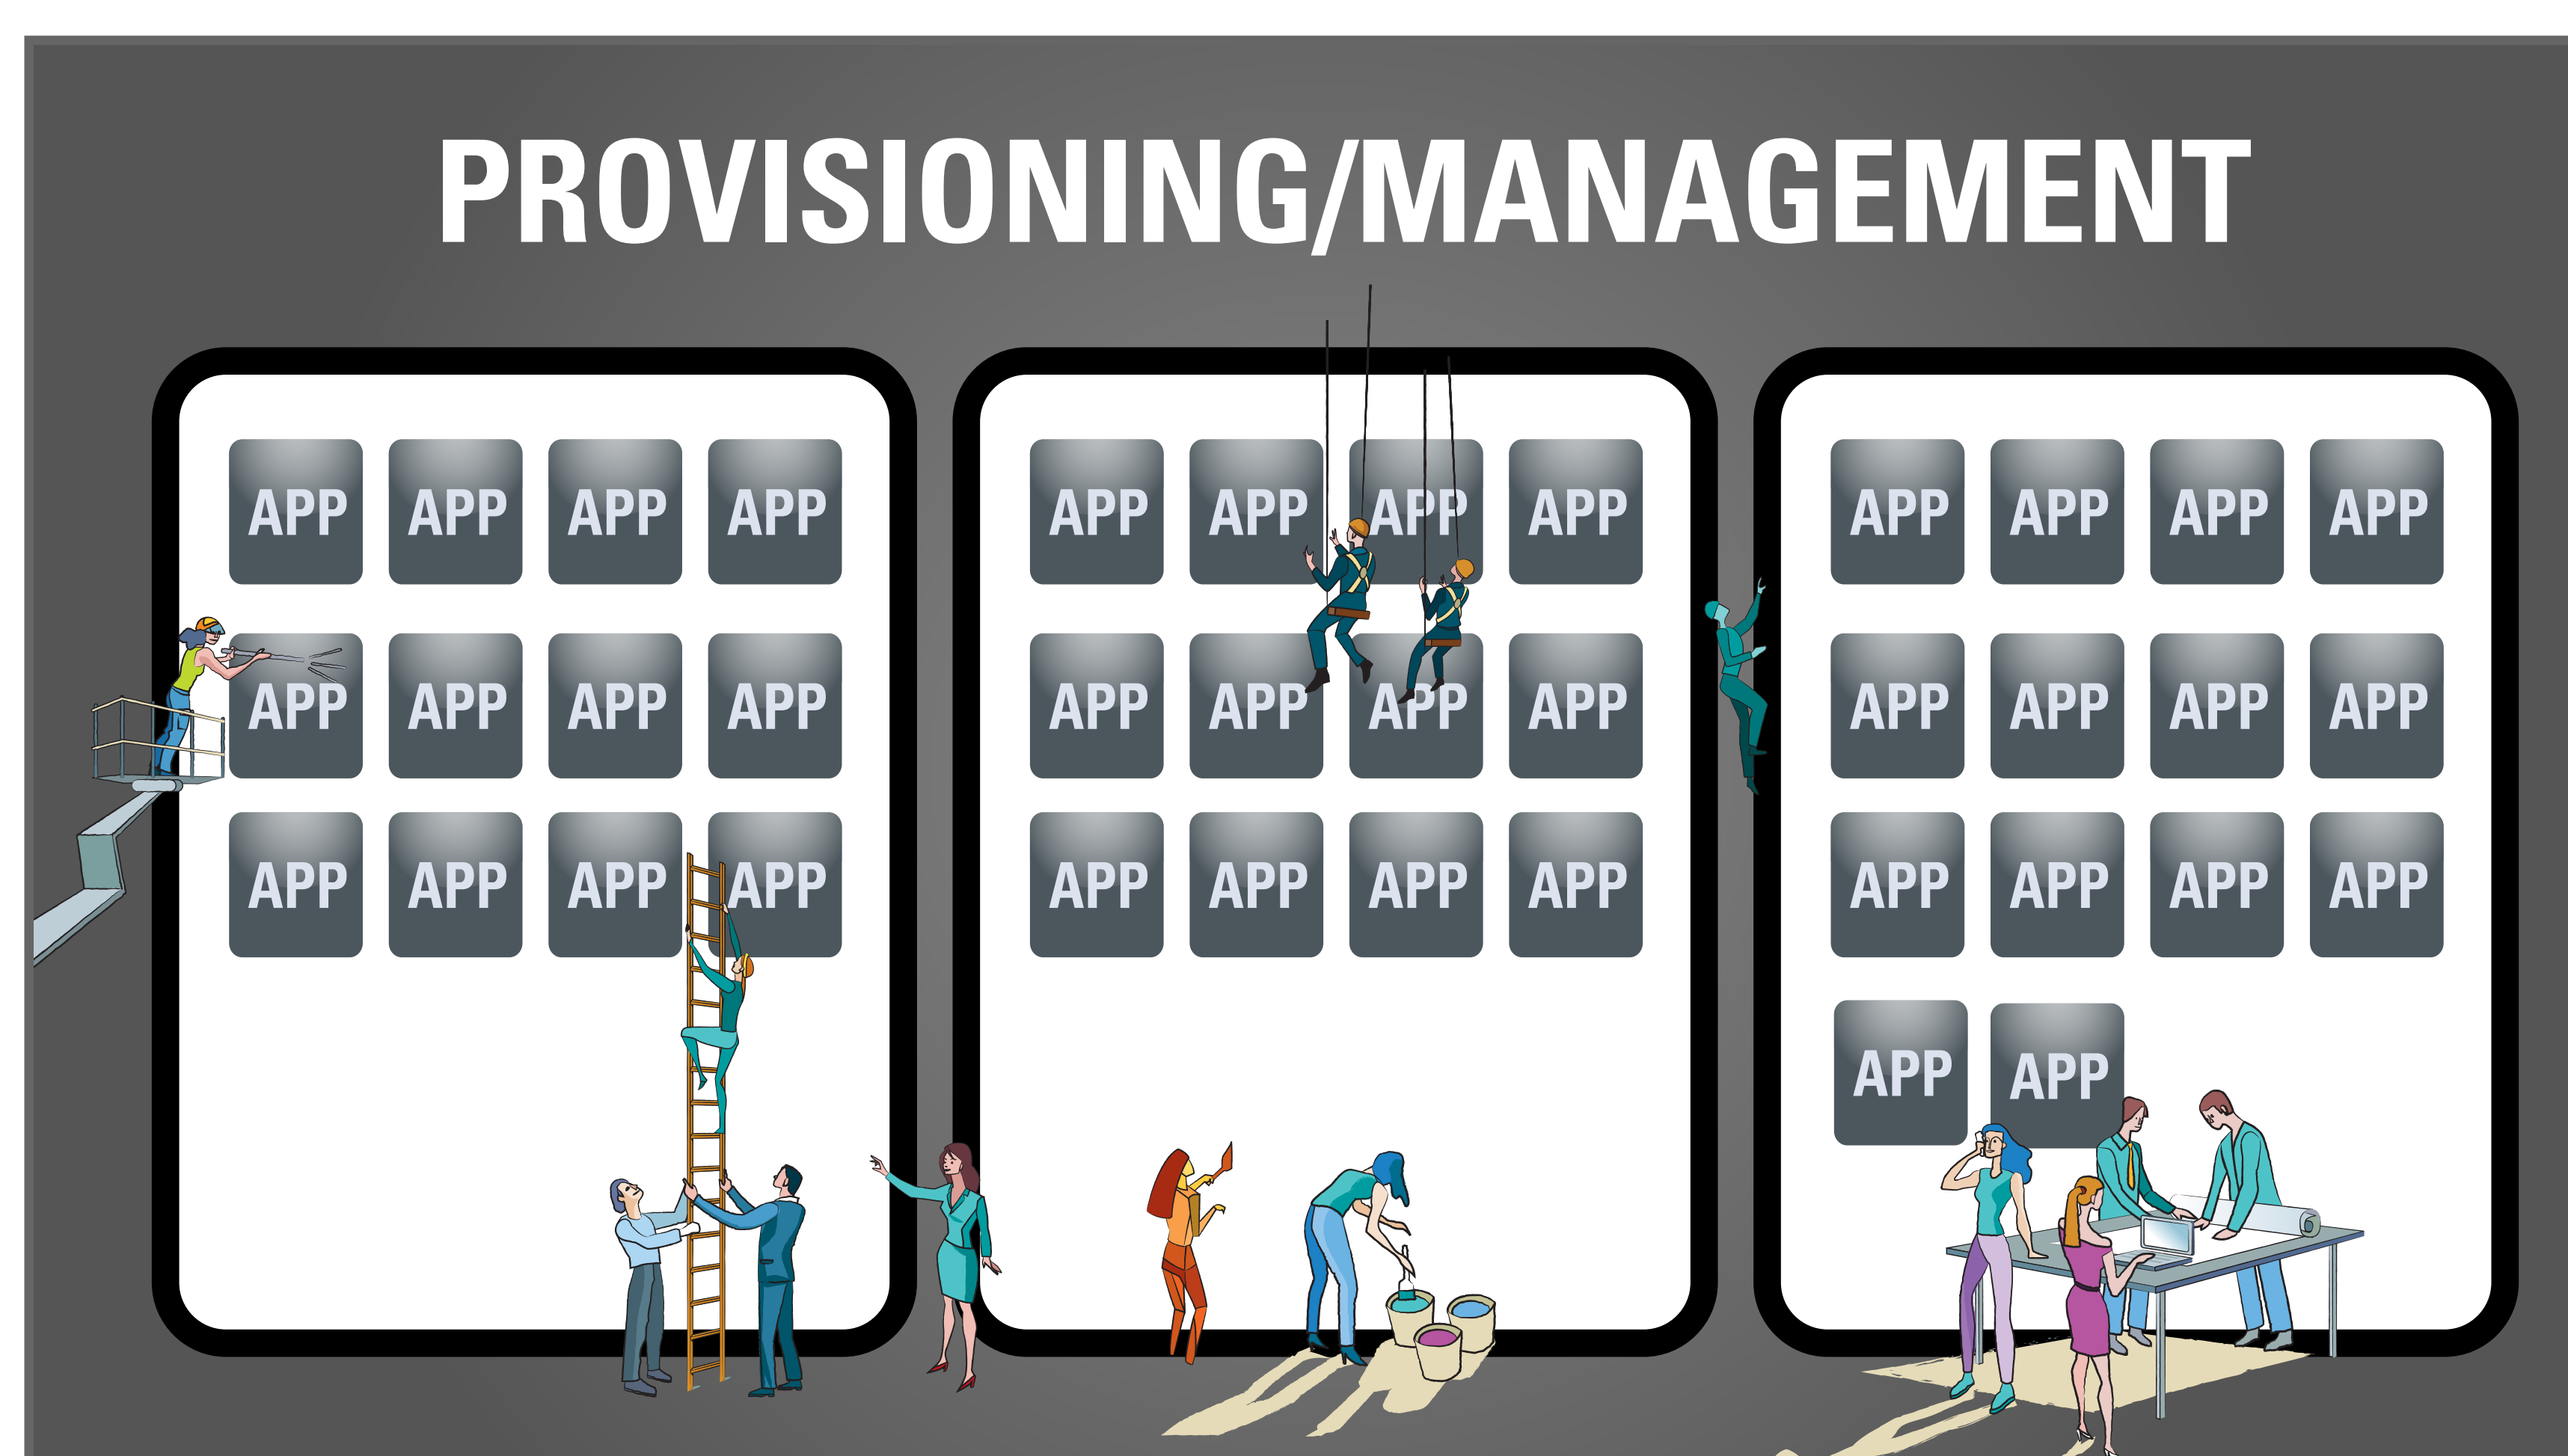

Pillared structure morphs into a calculator. Hand animates in to start adding up costs while the back chart animates cost rising out of control.

14: "xx"

**Animation Notes:**

Calculator morphs into boxes above starting with 1 app. Apps begin to multiply.

15: "xx"

**Animation Notes:**

As apps multiply people appear to represent the additional work in provisioning and management.

16: "xx"
